Threat Assessments

Professional Security Consulting, Inc., will survey and identify threats and offer solutions for the physical, strategic, and electronic properties of your buildings, operations, and locations.

Professional Security Consulting specializes in the following services:

- Threat Assessments
- Long-Range Planning
- Specialized Training
- Expert Witnessing
- Risk Carrier Negotiations
- Specification Development
- Preparation of Offerings

Our Mission

To provide clients the very best security advice and recommendations based on experience, research and continued involvement with the security industry's leading manufacturers.

Expert Witnessing

Experienced in providing expert opinions or explanations in events or circumstances involving electronic security equipment. We also offer behind the scenes support for your legal team or in court testimony. In suspect events or failure to respond situations we can review or consult on scenes, documentation, or equipment.

Preparation of Offerings

Need to determine the best method of soliciting responses to the proposed security solution in a public or private offering? We can provide explanations to each method to pinpoint specific advantages and disadvantages that require careful consideration and review.

Long Range Planning

Need to identify you long range security solutions? We will help you develop a plan to acquire these solutions and determine the budgetary considerations based on the cost of equipment, installations, and manning.

Specification Development

We can adequately perform specific requirements and develop specification by equipment evaluation and use assessment to correctly identify the appropriate manufacturers equipment.

Specialized Training

We offer specific security training in several areas. From training in security electronics equipment to operations and commissioning, we can help you succeed. In addition, we also offer sight specific training, documentation or operational guidelines.

Risk Carrier Negotiations

We design programs in conjunction with your risk carrier to reduce premiums and exposure. We can conduct negotiations on your behalf prior to executing security procedures, equipment renovations, or extensive security enhancements to reduce premiums in exchange for reducing risks.
